

# AmDisc™

Introducing the latest in  
Amniotic Membrane allograft  
Technology for Ocular  
Treatments!

## **AmDisc™ Amniotic Membrane Allografts:**

Procured, processed and configured with  
our focus on the surgeon and the patient

## **Tissue Safety: Donor Selection, Screening and Testing:**

AmDisc™ are recovered meeting stringent  
specification during donor screening and  
laboratory testing to reduce the risk of  
transmitting infectious disease

## **Standards:**

AmDisc™ allografts are procured and processed according to standards established  
by the American Association of Tissue Banks (AATB) and the United State Food and  
Drug Administration (FDA). All tissues are recovered under full informed consent of  
the planned c-section donors (represented by the mothers of the newborn children)  
The donors have consented to transfer of the allografts to third parties. A thorough  
medical exam and social history of the donor is also obtained, including detailed  
family history.

## **The donor is screened for:**

- Blood type and RH Factor HTLV-1  
Antibody Hepatitis Core Antibody
- HIV-1 Antibody HTLV-2 Antibody  
Hepatitis Surface Antigen
- HIV-2 Antibody Syphilis Screening  
Hepatitis C Antibody
- HIV-NAT CMV

All tests' results are reviewed prior  
to release of the tissue.

## **Reimbursement Information:**

**CPT Code 65778**

## **Product Information:**

- **Amniotic Membrane placed on  
the ocular surface "self-retaining"**
- **Shelf Life: 3 year / Room Temperature**
- **Thickness: 35 microns/ Single Layer**
- **Sizes: 8mm, 10 mm, 12mm Diameter Disk**
